District Junior Grain Club Members Place High at Toronto

Members of the Drumheller agricultural district Junior Grain Clubs and members of the Rockyford Club, who come under the direction of District Agriculturist N.F. Bell of Drumheller, took the lion's share of placings in the junior sections at the Toronto Royal, which has now concluded.

Top honors went to Ricky Sharpe of Munson and member of the Drumheller Junior Grain Club, who not only won the world championship in the open, but also the Junior championship.

Alberta entries attained 34 placings out of 35 in the junior competition.

The Drumheller agricultural district had 13 placings. Ricky Sharpe won first place, followed by Howard Roppel of Rockyford Junior Grain Club in second position.

Marjorie Lelske of the Carbon Club, who has been a consistent pacer for top position, was placed third. Other placings were: 5th, Phyllis Schuler, Carbon; 7th, A. Dunsmore, Rockyford; 8th, Danny McDermid, Drumheller; 9th, Lloyd Coad, Drumheller; 13th Ron Stevenson, Delia; 16th, Ken Hastie, Trochu; 18th Ray Schoeppe, Delia; 21st, Warren Schoeppe, Delia; 22, Daun Buyer, Carbon; and 28th, Ed Nakaska, Three Hills.

Hesketh Girl Injured When Hit by Truck

Miss Lucille McKellar of Hesketh is in Holy Cross hospital in Calgary following an accident on Sunday when she was struck by a panel truck driven by John Craig on 17th Ave. Miss McKellar suffered a fractured skull, fractured leg, severe back injuries and shock. Her condition is reported as critical. Two men walking ahead of Miss McKellar were also struck by the truck.

Winter ice activities in Carbon will soon be under way as work progresses at the curling and skating rinks. John Diede, caretaker of the skating rink, reports that the ice surface is still a little rough but will require only a few more floods to put it in excellent shape for skating. The rink is again being operated by the Carbon Lions Club and at the last meeting it was decided that fees for this season would be left the same as last year.

John Reid, who is in charge of the curling rink this year, has had ideal weather for ice making and expects to put in rings before the end of the week. The ice will be ready for use some time next week and skips are requested to complete their rinks as soon as possible so that a schedule may be drawn up. All new curlers are asked to hand their names to the secretary-treasurer, Bill Ross, so they may be chosen on a rink.

Be sure to attend the Carbon Junior Athletic Club's Amateur Night Friday evening, November 24th. Last year's presentation was an outstanding success and this year's program will be of the same high calibre.

Nominations for the 1951 slate of officers were made at the Carbon Legion meeting held Monday evening in the Legion hall. Election of officers will take place at the next meeting and all members are requested to attend.

It was decided to build a chimney in the southwest corner of the hall and instal a heater. A committee was appointed to look after details and will start work when the weather moderates.

Eight boys attended a reorganization meeting of the Carbon Boy Scouts, held Saturday in the Scout hall. Hugh Isaac and Jack Barr were in charge. When the boys have passed their qualifying tests leaders will be named and Troops formed. Another meeting will be held Saturday, November 25th and boys between the ages of 12 and 18 are asked to attend.

Russell Snell and Art Weigum attended a Lions Club zone meeting at Strathmore Sunday.

Mr. and Mrs. Ned Fuller and Mrs. Jim Bushby were weekend visitors in Calgary.

CARBON TRADING COMPANY

Morris Switzer, prop. — Phone 18, Carbon

An Essential Service

ANOTHER CROP SEASON IS ENDED in Canada and the products of the farms have been marketed or put in storage to be sold later or to be used by the farmers themselves. At this time we are once more reminded of the important part which transportation plays in the distribution and marketing of agricultural products. Distances are great in Canada, and differences in soil and climate give rise to a wide variety in the type of crops grown in different parts of the country. Fruits and vegetables grown in British Columbia are marketed in the Prairie Provinces, while surplus grain and livestock from the Prairies are distributed in British Columbia and in the East.

Trucks And Cars Used

In a booklet issued recently by the Dominion Department of Agriculture there is an interesting section on the importance of transportation in the marketing of agricultural products. Attention is drawn to the use of refrigerator cars, cold storage warehouses and grain elevators "which make it possible to market currently-produced products in a fresh condition to consumers in widely scattered areas, to carry over surpluses to periods when supplies are usually short, and to provide adequate storage for Canada's grain harvest." The extensive use of trucks in marketing farm products is also discussed. In 1948 truck licenses and operating costs of farm trucks in Canada amounted to \$30,813,000, while the costs for operating farmers' cars for business purposes was \$34,000,000. These figures indicate the importance of trucks and cars to production and marketing in Canadian agriculture.

Railways Move Farm Products

Railways are likewise vital to the marketing of the crop each year. In 1947 the Canadian railways transported nearly 35 million tons of agricultural products. The carrying of grain from the Prairies to the terminals at Port Arthur and Fort William as well as to Vancouver and Churchill is one of the greatest undertakings of the railways in this connection and each year many thousands of freight cars are sent to Western Canada to remove the wheat crop. In 1947, 13 million tons of wheat and 8 million tons of other grains were carried by the railways. Inland water transportation is also important in moving products from the lakeheads for export, as well as in supplying the Maritime Provinces and Newfoundland with farm products from other parts of Canada. The value of efficient transportation services in distributing and marketing the crop each year are shown in these facts and figures compiled by the Dominion Department of Agriculture.

Artists Invited To Design Stamps

OTTAWA.—The post office department invited Canadian artists to submit designs for Canadian postage stamps and offered to pay \$300 for each one accepted.

Postmaster-general Rinfret wants the character of Canada and Canadian art to be "displayed and publicized more adequately" on Canadian postage stamps.

For a beginning, the department wants designs representing the secondary industries of Canada, well-known Canadian wildflowers, the larger animals of Canada, portraits of Indians or Eskimos, symbols of native life, and outdoor activities and scenes.

To Live Well — Eat Well

CHEST COLDS A "MECCA" OINTMENT AND MUSTARD POULTICE

Don't take chances on a Chest Cold—it may become very serious. A poultice made up of two tablespoons of Mecca and a teaspoon of Mustard brings excellent results. It relieves congestion and reduces inflammation—prevents blistering. In severe cases change the poultice twice daily. Mecca Ointment is sold by all druggists—35c, 50c (tube), 70c and \$1.40.

MINARD'S
"KING OF PAIN"
LINIMENT

FOR CHILDREN!

If your child is run down and listless, he may be susceptible to many colds and minor ills. For such conditions we recommend Scott's Emulsion containing Natural Vitamin A and D with other necessary elements to improve energy and resistance. Buy a bottle today!

SCOTT'S EMULSION
NOT JUST A TONIC—
IT'S POWERFUL NUTRITION

But What Does The Chicken Think?

Technicians Rosemary Peplinski, (left), and Olive Newton of the University of California, Los Angeles, medical school, are studying one of the three-winged chickens used in skin graft studies here. The third wing, transplanted from another chick from egg to egg before birth, is attached to the chicken's breast. Researchers are trying to determine why a chicken wing can be successfully transplanted before birth, but not after birth. The answer may be a big help in the progress of surgery. Chicks involved in the experiments grow up to be healthy hens and roosters, except that half of them have three wings and the other half only one.

ODDITIES IN THE NEWS

An eight-year-old boy of Nobleton, Ont., borrowed his father's .22 rifle and went hunting on the farm of a neighbor, Lorne Sheardown. His day's bag was: two cows killed, two wounded.

A miniature calf weighing only nine pounds has been born on a farm near Namur, Belgium. It was otherwise normal.

A judge in London, England, ordered a pianist to take off his shoes when practising. A woman in the rooms below complained to the court because he stamped loudly on the floor while he practiced. She asked that the pianist be thrown out. The judge refused her request.

L. J. Gagnon, a Fort William motorist, found that it is some compensation to have a hunting licence when your car kills a deer on the highway. Damage to the car, which struck the deer on the Nipigon highway, was about \$150. Being the possessor of a hunting licence, Gagnon was allowed by the fish and wild life division of the department of lands and forests to keep the deer.

In Japan, even the bugs are bugs about neon lights. In an address at Edmonton, Sub-Lt. William Jackson, R.C.N. (R), of that city, said Japanese are going in for blue neon lights on their farms. The farmers use to bright lights to attract insects away from their rice fields. Their small farms are literally studded with blue neon, he said. Jackson served aboard H.M.C.S. Athabaskan during the early days of the Korean war.

In old age, normal people lose 12 to 14 pounds of the average weight.

GOT A BRONCHIAL COUGH?

When a hacking bronchial cough due to a cold, bronchitis or excessive smoking is getting you down, get wise—get Buckley's. A few sips will ease your cough—clear your head—make breathing easier. And remember, only in Buckley's do you get CARRAGEEN, an emulsion that soothes and lubricates dry, irritated, inflamed throat membranes, and stops the tickle that keeps you coughing. Get your bottle today for relief right away.

OVER 25 MILLION BOTTLES SOLD

BUCKLEY'S MIXTURE

PROGRESS MADE BY OIL DRILLERS AT MELITA, MAN.

MELITA, Man.—Good progress is reported in drilling on Souris Valley Oil's No. 3 well on the farm of Henry Downey at Couterville. Drills penetrated the Swan River strata at 2,077 feet, while the Favel zone was reached at the 1,675-foot level.

Both strata were reported encountered at higher levels than in previous wells drilled by the company.

DAIRY PRODUCTS

Production of butter and cheese for the month of September was down eight and twenty-one per cent, as compared with the same month in 1949. Ice cream was up three per cent, and concentrated milk products twenty per cent, for the same period.

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning

The liver should pour out about 2 pints of bile juice into your digestive tract every day! If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 3¢ at any drugstore.

TOWN GROWING

CARLYLE, Sask.—Steady growth of the town of Carlyle is reflected in a recent enumeration which set the population at 794.

Loftiest volcano in the world is 23,000-foot Sahama, in Peru.

MACDONALD'S BRIER

Canada's Standard Smoke

Bake this tasty CHEESEBREAD

easily, speedily with new Fast DRY Yeast!

• New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast! Never a worry about yeast cakes that stale and lose strength... new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

CHEESEBREAD

• Scald 3 c. milk, $\frac{1}{4}$ c. granulated sugar, $\frac{1}{2}$ tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl $\frac{1}{2}$ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-

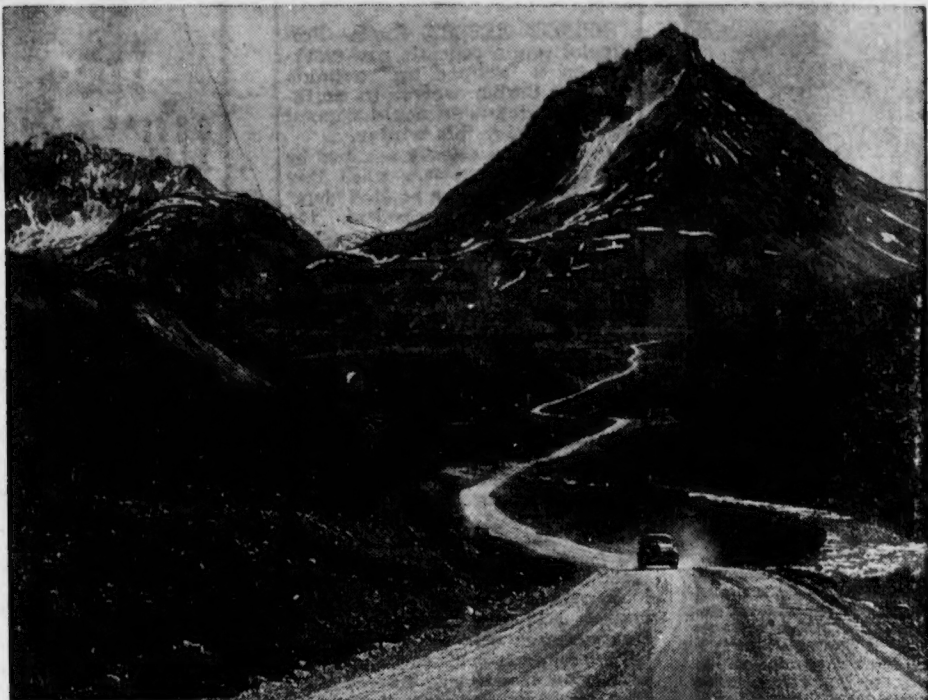

sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans ($4\frac{1}{2}$ " x $8\frac{1}{2}$ "). Grease tops and sprinkle each loaf with $\frac{1}{4}$ c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

THE TILLERS

—By Les Carroll

Alaska Expects Another Rush This Time of Paying Tourists

Motorists who have travelled in Quebec's Laurentians and the western Rockies have some idea of the Alaskan panorama. It's rugged but fascinating.—Central Press Canadian.

By H. D. CRAWFORD
(CPC Correspondent)

WASHINGTON. — Architects of Alaska's future envisage a tourist paradise in the vast ranges of snow-capped mountains, extensive virgin forests, navigable rivers and dashing mountain streams, ever-expanding highways, and ports along inlet-fringed coastline or chain of Aleutian islands jutting far into the Pacific.

Alaska's numerous future possibilities include that of northern playground for travel-bent Americans and Canadians seeking recreation amid scenic surroundings.

Alaska is so vast, so varied in surface characteristics that these planners of the future believe it offers recreational lure for every taste. Much progress has already been made. Thousands of tourists are showing increased interest in Alaska, not only as North America's last frontier but also as a haven for recreation.

The Alaska development board at Juneau has reported a great increase of interest in all aspects of Alaska, including recreation.

"Ultimately, the value of Alaska's recreational resources will exceed

the territory's present largest industry—the canned salmon pack," predicted a recent department of the interior report. It added: "To both residents and tourists the value of this resource, measured in terms of health and pleasure, will be incalculable."

Maine has proved that travellers can bring in \$100,000,000 yearly, and Canadians realize about three times that amount every year from tourists. Alaskans, seeing the \$300,000,000 a year tourist trade of Canada, visualize vast numbers of paying guests desirous of stretching office-bound muscles, filling smog-clogged lungs with fresh air, and feasting paper-wearied eyes on snow-capped peaks and endless stretches of green forests.

Mt. McKinley National park during the last two years has had its heaviest travel years on record. The number of persons visiting that scenic park in 1948 was 81 per cent. greater than in 1947. The McKinley Park hotel remained open throughout the year.

This national park, established in 1917, covers 3,030 square miles and features the highest mountain in North America. Mt. McKinley is 20,300 feet above sea level and rises 17,000 feet above timber line.

Hundreds of persons reach Mt. McKinley National park by plane, but the government-operated Alaska railroad is at present the only surface transportation. The railroad offers motorists special low rates for hauling their cars to and from the national park. Motorists can purchase gasoline and oil at the park and use their cars over the park's 89 miles of gravel roads. These roads extend 15 miles beyond the park's northern boundary.

Some persons travel by train from Seward, Anchorage or Fairbanks and see the park by bus. Many stay at the hotel. Others obtain permission to camp in the park's public camp grounds.

Glacier Bay National Monument contains 2,297,456 acres and is the second largest area under the U.S. National park service. Near the northern end of the southeastern Alaska Panhandle, it is famous for its tidewater glaciers. Its high peaks rise from an eternal icecap. As well as glaciers, visitors can see many types of wild animals in action.

Katmai National Monument is opposite Kodiak island near the base of the Alaska peninsula. Mt. Katmai's violent eruption in 1912 left a crater whose circumference exceeds eight miles. Here is also the renowned "Valley of Ten Thousand Smokes".

Old Kasaan National Monument, in Tongass National Forest in southeastern Alaska, contains historic aboriginal ruins of a former Haida Indian village. This example of aboriginal American civilization includes totem poles, grave houses, building frameworks and monuments.

Sitka National Monument, also in southeastern Alaska, preserves another rare collection of Alaskan Indian totem poles. These display excellent craftsmanship. Nearby is a replica of a Russian blockhouse, and graves of Russians killed in 1804 during the Battle of Sitka. In that battle the Indian tribe made a last stand against Russian settlers.

Alaska's two national forests likewise offer challenging recreational areas that are vast, interesting and alluring. Tongass National Forest covers 16,045,753 acres, and Chugach National Forest spreads over 4,801,902 acres. These are the largest single areas under the United States Forest service.

Alaska-bound travellers 50 years ago forged into Alaska dreaming of gold nuggets, but many of today's travellers seek more precious riches—health, fun and recreation in a frontier where men can still commune with nature.

Color movies date back to 1909.

Northern Saskatchewan Shows Definite Promise Of Becoming Another Mining Centre

PRINCE ALBERT, Sask.—A detailed picture of northland development—new schools, hospitals, air strips, docks and hotels—was given here recently by resources Minister J. H. Brockelbank. The Minister had made a one-week inspection tour of Northern Saskatchewan.

He said the La Ronge area, 150 miles north of here, shows definite promise of becoming a mining centre and jump-off place for settlements farther north. Tourist traffic had increased through the area.

A cross-strip at La Ronge airfield was being built. A repair depot, nose hangar, ramp and dock were being constructed at the seaplane base used by Saskatchewan Government Airways.

A government barge service was linking Fort Black and Ile A La Crosse, Beauval and Buffalo Narrows. Buffalo Narrows had become an industrial settlement with a fisheries operation and fish filleting plant. There was a new hotel and two extra schoolrooms had been provided.

At La Loche, near the Alberta border, a mission sawmill was making lumber for local use. The town had a hospital and school.

Goldfields, hot-spot of Saskatchewan's uranium hunt, is in "process of resurrection after being out eight years," Mr. Brockelbank said. A hotel had opened. Because mining and prospecting was on the increase, a resident geologist had been sent there by his department.

At Nicholson Mines, near Goldfields, a 30 to 50 man crew had cut roads. Electricity was being piped from Wellington Lake power plant, built during the earlier boom days of Goldfields by Consolidated Mining and Smelting Company.

Eldorado, where more uranium is sought, a new cookhouse and cafeteria had been built for about 150 men. Two underground shafts had been cut to reach pitchblende deposits.

A road linking Stony Rapids with Nisto Mines, on Black Lake, in the extreme north, had been completed. Buildings at the mines were being winterized to permit year-round operation. At Stony Rapids, an airstrip had been completed, along with a dock for barge traffic on Lake Athabasca.

A new hospital and school had been erected at Sandy Bay, near the Manitoba boundary, to serve the area around the Island Falls power plant which produces electricity for Flin Flon, Man.

Agriculture was progressing fast at Cumberland House, in Eastern Saskatchewan at about the same latitude as The Pas, Man. About 150 acres were being farmed now.

PAYMENTS URGED

PRINCE ALBERT, Sask.—Speedy wheat payments to farmers who suffered severe frost damage were urged by nearly 200 delegates to the federal Liberal Constituency association convention here. They asked Ottawa to pay "a substantial amount per bushel."

SAME ELEVATION

Lake Huron and Lake Michigan in the great lakes group have exactly the same elevation, 581.92 feet.

GEMS OF THOUGHT

DUTY

Whatever it is your duty to do, you can do without harm to yourself.—Mary Baker Eddy.

Fear God, and keep His commandments: for this is the whole duty of man.—Ecclesiastes.

Let men laugh, if they will, when you sacrifice desire to duty—You have time and eternity to rejoice in.—Theodore Parker.

Our grand business is not to see what lies dimly in the distance, but to do what lies clearly at hand.—Carlyle.

A duty dodged is like a debt unpaid; it is only deferred, and we must come back and settle the account at last.—Joseph Fort Newton.

The path to God is the path of the trivial round and the common task.—Robert Norwood.

On The Side : By E. V. Durling

"Young women are very enthusiastic about the double-ring ceremony for weddings," writes a bachelor. "The bridegroom, poor wretch, pays for the rings. However, when engagement rings for both persons concerned are suggested, the girl to pay for the man's ring, the females lose their enthusiasm. The girl's like to be romantic, but not when it costs them any money."

They Must Be Wrong

Men are children at heart. The best way to handle a husband is to mother him. That is the advice offered by an alleged expert on life among the married. A ridiculous suggestion. I urge our feminine subscribers to pay no attention to it. When a woman "mothers" her husband too much he begins to think of her as his mother. That inspires him to play around with other females. The best way to handle a husband is to be a sweetheart to him, make him comfortable in his home and give him good food, well served.

'Twas An Irishman Who Did It

At Rugby school in England there is a memorial tablet bearing this inscription: "This stone commemorates the exploit of William Webb Ellis who with a fine disregard for the rules of football as player in his time first took the ball in his arms and ran with it, thus originating the distinctive feature of the rugby game, A.D. 1823". So William Webb Ellis is credited with being a highly original lad who made rugby what it is today. The fact of the matter is that Ellis was an Irish boy. In football as played in Ireland in his day, and for centuries before, the players always picked up the ball and ran with it. So Ellis was merely playing the game at Rugby as he had played it in Ireland.

A man was allergic to his wife. When at home he had headaches, fits of sneezing, etc. When his business took him away from home he felt fine. An allergist made a study of the situation. He discovered the husband was allergic to a certain type of cosmetics used by his wife. When she discarded the cosmetics he no longer had the headaches and sneezing fits. So mister, if you suffer similarly, check on your wife's cosmetics.

Hard To Satisfy

Are you interested in an "island paradise" as a place or residence? Ever hear of Norfolk island? It is 600 miles from New Zealand. On Norfolk island there are no taxes, crime, politics, gales, hurricanes, insects or snakes. Swimming is an all-year round sport. Food is abundant and cheap. The island has a nine hole golf course, tennis courts, dance hall and moving picture theatre. An Englishman who, despite all this, became lonely for his native land, offered to sell his Norfolk island real estate agency business for \$300, with the buyer having the privilege of renting a five-room apartment for \$17 a month.

The Lion Lost To Sandow

A wrestling match between Sandow, the strong man, and a lion, took place about 50 years ago. The lion sprang at Sandow who promptly took a hold on the animal and threw him over his head. Then the lion quit.

A. G. Bell Was Right

Alexander Graham Bell, inventor of the telephone, was also a pioneer in studies of heredity and eugenics. He was the first to advance the claim that the youngest mothers produce the longest lived children. This claim has since been confirmed by much research on the subject. So if your mother was 21 or under when you were born your chances to be around for some time are very good. The age of the father is not important.

"Let Dreams Go Unanalyzed"

Listen, mister, don't tell anybody your dreams. Especially don't tell your wife. She may have read a book by Freud of a volume on psychoanalysis. A man in Paris told his wife he had a dream about rocks. She had been studying psychoanalysis. Such a dream is alleged to indicate "amorous pre-occupation". The wife suspected her husband was playing around. She kept asking him about his dreams. Every now and again he would say he dreamed of rocks. She put a detective on his trail. Her worst suspicions were confirmed. She sued for divorce.

YOU'RE TELLING ME

By WILLIAM RITT
Central Press
Canadian Writer

The humming bird, we read, can lick any bird its size. Which, unfortunately, has to be another humming bird.

Annoyed by a honking automobile, a Canadian deer wrecked it. Amazing how intelligent some "dumb" creatures are!

One town in the Dominion will experiment with heated sidewalks. The poor pedestrian—now he gets the hot foot!

A lover's lane with "reasonable supervision" is being considered at the University of Wisconsin. Another way of saying "reasonable supervision" is "three's a crowd".

The lover's lane is to have electrically-lighted benches. Just as though the moon can't do a better job!

A judge in Worthing, England, fined a passenger a pound for falling off a train. Wonder what the fine would have been if the luckless rider had fallen under the train.

Forty guests were made violently ill by the food they ate at a wedding breakfast in Alexandria, Egypt. Gosh, and the bride had yet to try her hand at making biscuits!

Zadok Dumkopf says it's no wonder women complain so much about feeling tired—the act of speaking sets 72 muscles into action.

A trail of flowers dropped from a bouquet he swiped led to the arrest of an Austrian burglar. Ah, that primrose path!

LOOKS FROM HERE AS IF WE NEED HYDRAULIC BRAKES!

World Happenings Briefly Told

The Manitoba Flood Relief Fund received \$185,464 through the efforts of the Imperial Order Daughters of the Empire, Mrs. John H. Chipman, national president, said.

J. Gibson Kerr has returned to Edinburgh from Texas with a fat order in his pocket. He sold wealthy Texans 1,000 Shetland ponies to be used as pets for the ranchers' children.

Six hundred persons fled to safety in St. Florian, Austria, when three tons of molten metal spilled from a mould and flowed toward a stand erected for spectators at a bell-casting ceremony.

A large treasure of silver coins, believed 1,000 years old, has been discovered during excavations at Trondheim in central Norway. Some of the coins were minted by King Canute and others are of German and Arabic origin.

Two doctors, a woman teacher and 26 nurses, all of Alberta, were awarded \$23,400 in federal bursaries to undertake post-graduate training in public health. The training will be given at the Universities of Alberta and Toronto and McGill University at Montreal.

The U.S. economic co-operation administration allocated \$4,267,000 to the Netherlands, part of which was for purchases of copper and copper products, rubber and rubber products, and non-metallic minerals from Canada.

A Rolls Royce "Silver Dawn" car reported to be worth \$11,000 (\$30,800) and built for Mrs. Eva Peron, wife of the Argentine president, was shipped from Southampton recently.

New Zealand spends about \$5,000,000 (\$15,000,000) in Canada a year.

FASHIONS

Versatile Jumper

4897
SIZES
34-50

Anne Adams

A jumper for the mature figure! The smart box pleats are stitched for waist-flattery. The neckline is scalloped, a pretty frame for the blouse—and for your face!

Pattern 4897, sizes 34, 36, 38, 40, 42, 44, 46, 48, 50. Size 36 jumper, 3½ yds. 39-in.; blouse, 2½ yds.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

Send Twenty-five Cents more for our Anne Adams Fashion Book. Pages of patterns for the whole family; gifts, too. Free pattern of a hat—a head-hugging helmet—is printed in the book.

The highest volcano in the world is Popocatepetl—"smoking mountain"—near Puebla, Mexico. It is 17,748 feet high. 2907

Christmas Cakes

A slice of Christmas cake, mellowed and rich with fruits and nuts, is always best if it's allowed to age a little before cutting.

With Christmas only weeks away now is the time to be making those light and dark xmas cakes to give them ample time to ripen to a mellow mixture of rich fruit, nut and spice flavors.

Dark Christmas Cake

Three cups cake flour, 2 tsp. baking powder, 1½ tsp. cinnamon, 1 tsp. cloves, ¼ tsp. nutmeg, ¼ tsp. mace, ¼ tsp. salt, 1 cup shortening, 1½ cups brown sugar, 3 eggs unbeaten, 2 cups raisins, 2 cups dates, 1 cup figs, 2 cups nuts, 1 cup candied cherries, 2 tsp. candied orange peel, 2 tsp. candied lemon peel, ½ cup candied pineapple, ¼ cup preserved citron.

Sift and measure flour, then sift flour, salt, baking powder and spices together. Cream shortening and sugar, add unbeaten eggs and beat well. Add dry ingredients alternately with ½ cup grape or peach juice and 1 cup jam. Add lightly floured chopped fruits and nuts, and mix thoroughly. Pour into a large tube or loaf pan lined with greased waxed paper. Bake at 275 degrees for 1 hour, then increase oven heat to 300 degrees F., and bake approximately 2 hours more.

White Fruit Cake

Three-quarters cup shortening; 1 cup fine granulated or fruit sugar; ½ tsp. vanilla; ½ tsp. almond extract; 3 eggs; 1 cup bleached suet; 1 cup mixed peel; 1 cup sliced candied or maraschino cherries; ½ cup blanched, slivered almonds; 2½ cups sifted all-purpose flour, or 2½ cups sifted pastry flour; 1 tsp. baking powder; 1 tsp. salt; ¼ cup fruit juice.

Cream fat, add sugar, vanilla and almond extract, and cream well together. Add eggs, one at a time, beating after each addition. Dredge fruit and nuts with part of the flour. Mix and sift remaining flour, salt and baking powder, and add alternately with the liquid. Mix in the floured fruit and nuts. Line a deep pan with greased paper and fill two-thirds full with the batter. Bake in a slow oven, 300 degrees F., for about 1½ hours. Makes a 2½ pound cake.

VIRGIL

PRISCILLA'S POP—Sorry! Wrong Number!

Kill Wolves By "Suicide"

PRINCE ALBERT, Sask.—Provincial game officials are working on a "souped up" cyanide shell so timber wolves in northern Saskatchewan could commit suicide easier this winter.

Cyanide guns actually are fired by the animals themselves when they come to investigate a scented "lure" and trip a hidden mechanism. The guns have proved highly successful in killing coyotes in southern Saskatchewan and officials wanted to make sure they are just as successful against timber wolves by packing more cyanide in the shells. Field men were pinpointing wolf trails to determine the best spots for the chemical destroyers.

Officials had another weapon against the wolves, which takes a heavy toll of deer, moose, elk and fur-bearing animals. This was the bait station consisting of an animal carcass treated with the poison "1080". These stations had accounted for a good number of coyotes in southern areas last winter.

In addition to these new hazards, wolves still had to worry about sharpshooters who collect a bounty of \$10 for each wolf. In this respect the anti-wolf campaign differed from the war on coyotes, since the bounty system for controlling coyotes in southern districts had been discontinued as ineffective.

Officials said the stepped-up war against the black or greyish brown timber wolves did not mean there were more wolves than ever before. On the contrary, the wolves apparently controlled by a "cycle" were less numerous than in some past years. But there were still enough to warrant an all-out offensive.

♠ 33	♠ 75
♥ K 9 7	♥ 10 6
♦ A Q 9 6 4	♦ K 10 5
♣ A 10 3	♣ Q J 7 5 2

England gained points on this hand from the 1939 match against Scotland. In both rooms North bid One Diamond, South One Heart and North Two Hearts. The Scottish South jumped to Four Hearts and was set two tricks after West had found the inspired opening lead of ♠ K.

The English South made the more subtle rebid of Three Clubs, prepared to play the Hand in Three Hearts if North had to sign off. With the fit in Clubs, however, North was able to bid Four Hearts. The psychic trial bid worked to the extent of inhibiting a Club attack until too late. West led ♠ A and South declined the Heart finesse, running ♠ J after cashing ♥ K and ♠ A and thus making 10 tricks. In this instance the trial bid was made by responder.

Weekly Tip

CUSTARD CUPS

If the custard cups are buttered before filling them you will find that they will be much easier to wash.

In business ignorance is not bliss.

Frosted Flax and Ergot Poisonous
This article is to point out that
definite dangers from poisoning are
associated with the feeding of frosted
flax plants and ergot-infested grains
or roughages to livestock.

Frosted Flax. Chemical analyses
on frosted flax, recently carried
out at the Dominion Experimental
Station, Swift Current, indicate that
death may result from the con-
sumption by farm animals of even
fairly small quantities of frosted
flax plants.

The best precaution farmers can
take is not to turn livestock into
fields of immature, unharvested
frozen flax. For protection against
livestock poisoning, and also to pre-
vent the over-wintering of certain
destructive flax crop diseases, such
as rust and pan-mo, unharvested flax

should be completely plowed under,
or otherwise destroyed, this fall.
Farmers who have harvested frosted
flax for feed this year would be
well advised to send a sample, con-
sisting of about one pound of
material, to the Dominion Experi-
mental Station, Swift Current, for
analyses. This is indeed a valuable
service to the flax growers of
Western Canada.

Ergot. The ergot disease of grain
crops, particularly of rye, barley
and wheat, is well-known to most
farmers. It is caused by a fungus
(mold). The large, purplish to black,
horn-like bodies (ergots), which
develop in the heads of diseased
plants and are quite conspicuous
in the threshed grain, are poisonous
to man and livestock. Every care
should be taken, therefore, to re-
move the ergotized kernels from
grain that is to be used for human
or livestock consumption. Any grain
feed which contains 0.1% or more
of ergot is considered a source of
danger to livestock. Moreover, as
a very small concentration of ergot
in feed may cause abortion, ergotized
material should be excluded com-
pletely from the rations of mares,
cows, sows and ewes. Don't take
a chance! Recognize the dangers
that are associated with the feed-
ing of ergot and frosted flax plants
to livestock.

GUN

ALONE

**Your help
is needed**

NOW

TO ENLIST YOU MUST —

1. Be a Canadian citizen or British subject.
2. Be between 17 and 29 years of age.
3. Be single.
4. Meet Army test requirements.
5. Volunteer for service anywhere.

REPORT RIGHT AWAY TO:

No. 10 Personnel Depot, Currie Barracks,
CALGARY, Alta.

Headquarters, Western Command,
Kingway Ave., EDMONTON, Alta.

AS478-AYV

To bring this anti-aircraft gun into action calls for
a full crew — skilled men trained to fight as a fast-
thinking, fast-acting team. To train such a crew takes
time: gun crews must know how to handle modern
scientific equipment — electronics, radar, radio, tele-
phone; men must work together with the closely timed
co-ordination of a championship football team.

The Canadian Army Active Force needs men today
... keen young men who can begin training immedi-
ately as anti-aircraft gunners. You can take your place
at the side of the men who defend Canada by re-
porting for training without delay. Act now — and
help make Canada strong.

Drumheller School Division No. 30 NOTICE OF Annual Meeting For All Subdivisions

Take notice that annual meetings of electors of
school districts in all subdivisions of this School Division
will be held as indicated below:

Subdiv. No.	PLACE	DATE 1950	Time
1.	Three Hills Elks' Hall	Monday, Nov. 27th	2 p.m.
2.	Morrin Hall	Tuesday, Nov. 28th	2 p.m.
N-3	Delia F.U.A. Rest Room	Wed., Nov. 29th	2 p.m.
4.	Carbon Scout Hall	Thurs., Nov. 30th	2 p.m.
N-5	Administration Bldg., Drumheller	Friday, Dec. 1st	2 p.m.

At meetings marked (N), nominations for the office
of divisional trustee will be received at any time prior to
the hour of 4 o'clock p.m. The subdivisions in which
Trustees are to be elected are Nos. 3 and 5

Forms J and K, to be used in making and con-
senting to nominations, may be obtained from the Secre-
tary of your local District, or from the undersigned:

King Gustaf VI

King Gustaf V

NEW KING OF SWEDEN PROCLAIMED—Prince Gustaf Adolf, 68, was proclaimed King Gustaf VI of Sweden in the Royal Castle, Stockholm. He succeeds the late Gustaf V, who died recently after 43 years of reign.

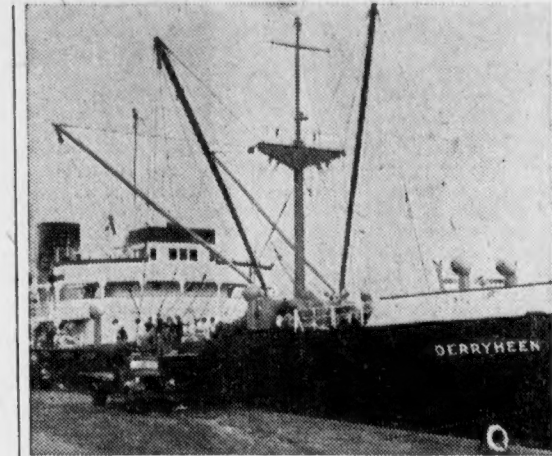

DUTCH TROOPS SAIL FOR KOREA—These Dutch volunteers, boarding the troopship *Zuiderkruis* at Rotterdam, are bound for Korea to join the United Nations forces.—Central Press Canadian.

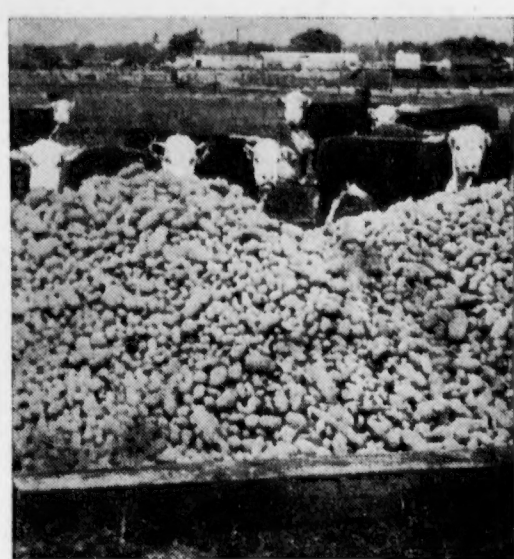

INTERESTED IN SYMBOL OF AUTHORITY—African sign of dignity is an immense umbrella, but the Oba Alaiyeluwa Ologbogi, second Olawo of Owo, West Nigeria, is just as interested in the West's insignia of civic leadership—this massive mace dating from 1707 and shown him by the mayor of Plymouth, Eng. The Obana, his senior wife, (right), are on a tour of Britain.—Central Press Canadian.

WOMEN PIPE SMOKERS—Carl A. Piercy, a quiet man who is a top engineer with General Electric in Schenectady, N.Y., when not polishing or puffing one of his 300 pipes, was in Montreal recently to open the first convention of the International Association of Pipe Smokers ever to be held in Canada. With Leslie Greene, president of the Montreal branch, he explained that this get-together of pipe smokers would see 200 representatives from all parts of the United States and Canada gathered in the Legion Memorial Building. Branches in Britain, Holland, Belgium, France, Italy and Israel will be represented by proxies. To these men a pipe—be it wood, stone or six feet long—is a symbol of democracy, a political creed, a religion. And the urge to puff on a briar is not just confined to men as several women delegates from New York state, their pearly white teeth firmly clenched about pipe stems, arrived to bring the feminine touch to the proceedings. In the photo above Mrs. Hugo Gnam of Jefferson Valley, N.Y., and Mrs. Renee Hoppee, of New York City, light up for a refreshing smoke.

BRITISH FREIGHTER DERRYHEEN—A 40-day, 9,500 mile voyage from the Island of Mauritius, in the Indian Ocean, to Montreal is a "short run" for the British freighter *Derryheen*, according to her master Capt. Richard Storm. The ship recently sailed into port with a cargo of sugar from half-way around the globe. The Captain recalled the last voyage in which the vessel was away from her home port in England for 18 months. The ship sailed from Britain, on that occasion, for Japan, then to Australia, New York, back to New Zealand, India, Egypt and various other countries which totalled some 80,000 sea miles before returning home. She was built in 1943 to serve with Atlantic convoys as an aircraft carrier.

FODDER, FODDER ALL AROUND—Hills of potatoes at two dollars a ton mystify an Ellenburg, Wash., herd of Hereford steers, who can't get used to having their spuds dyed blue. Ranchers pay that price to the government for fodder spuds, dyed to prevent resale.—Central Press Canadian.

—Central Press Canadian.

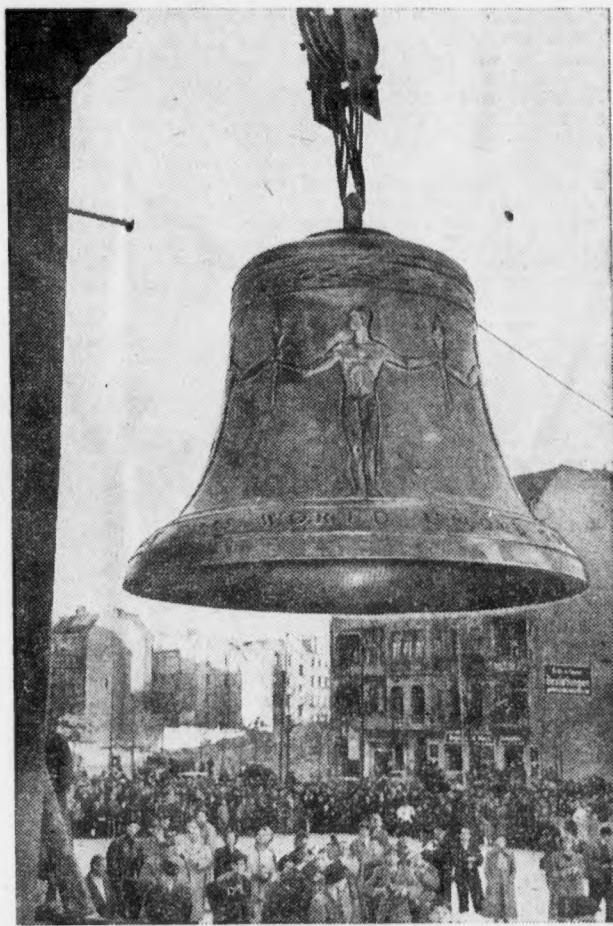

NEW DIVING LUNG PROVES SUCCESSFUL—Tests of a new French diving lung, made off San Pedro, Calif., apparently succeeded despite the unexpected interference of a 12-foot shark. At left, diver Terry Cox wears a lung which features a compressed air tank on the back. At right, Jacques Yves Cousteau, co-inventor of the new-type device, wears a rubber and fabric suit, equipped with the webbed-feet used by the French.

—Central Press Canadian.

JUST LIKE A MAN, HE WAS NERVOUS—A nervous groom is this unnamed kangaroo imported from Australia to set up housekeeping with Marana, the lonely lady of the Toronto Zoo. Marana was presented to the zoo a couple of years ago by the Toronto Men's Press club. When the two were introduced the bashful groom kept running around the cage that Marana lost interest.

Some 50 per cent. of polio patients recover completely.

FREEDOM BELL TOLLS FOR PRISONERS—This ten-ton freedom bell, created for Communist-surrounded West Berlin by U.S. public subscription, tolled from the tower Schoeneberg Town Hall recently in memory of German prisoners of war still held in Russia. Traffic came to a standstill for two minute interval. The huge bell is shown above being raised by windlass to the top of the tower as hundreds of West Berliners look on.

VICTOR FRANCO, 20-year-old cadet candidate to the Military Academy of Saint Cyr—France's West Point—left recently for Paris after chalking up a memorable 18,500 mile cycling trip that materialized out of the zinc and lead mines of French Morocco. He is shown above being congratulated by Jean Phisel, Montreal representative of the French Tourist Office, on the near completion of his cycling trip which has taken Franco from Paris to San Francisco and back to Montreal.

Construction In Bustling Flin Flon A Nightmare

FLIN FLON, Man.—The people of this bustling mining town claim the place is like nothing else in the world. They're probably right. The main section of Flin Flon, where older houses and most business premises are built, is perched on the hard-rock surface of the pre-Cambrian shield. Construction is a nightmare.

Most basements are above ground level.

Sewer and water pipelines run above the ground — some of them over the heads of pedestrians — instead of being buried.

Street lights burn night and day.

If you die in winter, your body goes into cold storage for burial in the Spring when the ground thaws.

There are proportionately more children of pre-school and school age than in any other town of the same size in Canada.

But for all its oddities, Flin Flon (on the Saskatchewan-Manitoba border 400 miles northwest of Winnipeg) is going ahead.

Plane To Patrol Oil Line

TORONTO, Ont.—It's a long hike from the Great Lakes to the Alberta oil fields, but there will be no tramping for the inspector who will look over the 1,180-mile long pipeline when it is completed.

Instead, he will travel aboard a new Cessna aircraft which will fly over the route once a week. It will be the first time in Canada that a plane has been used to spot leaks in an oil pipeline.

The interprovincial Pipeline Company expected to have the pipe down and in use by the fall and then bush pilot Danny Driscoll will make a weekly inspection trip which in all will cover some 2,500 miles. Driscoll will make the return trip in four days with one day's allowance for bad weather.

Flying between 200 and 400 feet above the line, the veteran of many hours in the air, will watch for patches of oil over the pipe drift-wood and other trash at water crossings. Since the pipe is of all welded construction and buried three feet underground there is little chance that leaks will occur. If they do, it is Driscoll's job to report oil patches to one of the stations located every 200 miles along the line.

Helpful Hints

If cage birds are tormented by insects, hang a small bag of sulphur in the cage.

To clean the glass container of an electric mixer, just turn the switch on and beat up a batch of suds and warm water.

For safety's sake, every stairway should have clear lighting the full length. A two-way switch at both top and bottom of the stairs is recommended. Cellar steps should be adequately lighted and stairs painted white.

If the skin or pelt side of your furs is hard and dry, or if the hair sheds, rub an oil soap into the skin until it is flexible. To do this, pin the fur to a board, skin side up, and rub in paste oil soap or thick soap-suds into which a little neatfoot oil has been whipped.

ANSWERS TO QUIZ

1. Collection of Huts.
2. Quebec, Ontario, Manitoba, Sask.
3. Niagara, Ottawa, Nipigon, Sack.
4. Erie, Ontario, Manitoba, Nipigon, Sack.
5. Ottawa, Quebec, Toronto, Winnipeg.
6. 118,000.
7. True. Hon. Harry Nixon and Hon. Mitchell Hepburn were honoured by being made chiefs.
8. Dog.
9. Maltie or Indian corn and beans.
10. Tecumseh.
11. Marathon runner.
12. Lacrosse.
13. Miss Pauline Johnson.
14. True. Many came and settled on the Grand River.
15. A Service of Exchanging Gifts.
16. Quebec City.
17. 5,000,000.
18. True. They were quite democratic in many ways.
19. Hiawatha.
20. False. He was killed in the U.S.A.
- Bonus. A meeting place.

Protein Content Of Frost Wheat Equal To Average

WINNIPEG.—The board of grain commissioners said that protein content of this year's frost-damaged wheat crop is equal to the average for the last 20 years.

The board said laboratory tests had placed the average protein content of the contract or milling grades of wheat at 13.6 per cent. This is .2 per cent. lower than for last year but the same as the 20-year average.

"Inclusion of data for No. 5 wheat, in order to obtain better representation from certain badly frost-damaged areas, raises the average to 13.7 per cent," an announcement said.

"It must be remembered, however, that No. 5 is not a milling wheat."

The protein content was determined on the basis of analyses of 4,522 samples of the contract grades (No. 1 to 4 Northern, 1 to 3 Garnet) and 873 samples of No. 5 wheat.

The samples were collected from 1,277 shipping points in Saskatchewan, Alberta and Manitoba.

The protein map issued by the board shows areas where protein averaged more than 14.9 per cent. located north, south and east of Edmonton, in the far south-eastern corner of Alberta, and north-east, and south of Saskatoon.

Most of the rest of Saskatchewan, except for the south-western corner, averaged between 13 and 14.9 per cent. The south-eastern corner of Saskatchewan and most of Manitoba averaged between 11 and 12.9 per cent.

Smile Of The Week

"You can't marry her without permission," said the father.

"Why not?" asked the swooning swain.

"Remember she's a minor."

The young man looked stumped for a moment, then asked: "You mean I gotta ask John L. Lewis?"

The Grand Canyon is a mile deep and four to 18 miles across.

A Quiz On Canada

(By F. W. Rayfield)

The Indians lived in America for centuries before the white men came. They were farmers, fishermen, hunters and traders. They gave beautiful Indian names to lakes, rivers, mountains, and sections of Canada. Try this quiz. Mark 5 points for each correct answer. A score of 60 is good. Try it on your friends.

1. Canada is an Indian word meaning, Land of Snow, Happy Hunting Ground, A Collection of Huts. Which?
2. Name four provinces that bear Indian names.
3. Name three large rivers in Canada that bear Indian names.
4. Name four Canadian lakes that bear Indian names.
5. Name four important Canadian capital cities which bear Indian names.
6. How many Indians in Canada — 88,000, 118,000, 138,000?
7. Two premiers of Ontario were Indian chiefs — True or false?
8. What domestic animal did Indians have — Cow, dog, horse?
9. What important grain did Indians grow on farms?
10. What famous Indian chief lost his life defending Canada in 1812?
11. Was it Pontiac, Foundmaker, Tecumseh?
12. Tom Longboat was famous as an oarsman, soldier, marathon runner. Which?
13. What sport did Indians engage in before the white men came? Hockey, skiing, lacrosse? Which?
14. What was the name of the famous Indian poetess and reciter who was born near Brantford? Miss Anderson, Miss Johnson, Miss Thomson. Which?
15. Some Indians were U.E. Loyalists. True or false?
16. What is an Indian Potlach — A Spring service, a Thanksgiving service, a Service of Exchanging gifts. Which?
17. The Indian village of Stadacona was near — Toronto, Montreal, Quebec City. Which?
18. How many acres of land are set aside as Indian Reserves — 1,000,000 acres, 3,000,000, 5,000,000 acres?
19. The Indians were more democratic than the French before 1760. True or false?
20. Longfellow wrote a poem about the Indians. What was its name? Sitting Bull lost his life in the North West Rebellion. True or false? Bonus. The Indian word Toronto means, Beside an Island, A place to meet, Western port. Which?

(Answers found at bottom of page)

ALBERTA BOY SECOND IN RIDER EVENT

BOSTON.—Tater Decker, Roswell, N.M. cowboy, won the saddle bronc riding contest for his third victory in a rodeo at Boston Garden. Previously he had won the steer wrestling contest twice.

Carl Olsen, Cardston, Alta., was second in the saddle bronc event, and Neal Allen, Hot Springs, S.D., third.

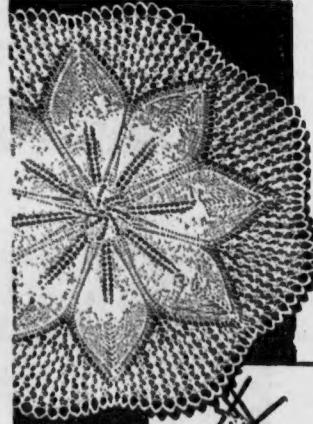

GREATEST FORTRESS

The greatest fortress in the world, from a strategic standpoint, is the Rock of Gibraltar in the Mediterranean.

Dates contain 66 per cent. sugar.

TRY AND STOP ME!

By BENNETT CERF

When Judge Charles Ramsgate was sitting on the bench in night court recently a fugitive from Alcoholics Anonymous was dragged before him charged with drunk and disorderly conduct. Judge Ramsgate looked over the prisoner's record that had been placed before him, started visibly, and said, "Do you realize that this is the seventh time you have been before this court on the same charge in the last six months?" The prisoner straightened momentarily, wiped a tear from his bleary eye, and pleaded, "Gee whiz, Your Honor, nobody's perfect."

There's the old story of a rather remarkable reindeer who ambled into a saloon one day and ordered a shot of Scotch. The barkeep charged him two dollars, and remarked, "I don't believe I ever saw a reindeer drinking Scotch before." "And until you cut your price in half," answered the reindeer, "you never will again."

CHRISTMAS IN THE MAKING

ANNE ADAMS Sew Originals

CHRISTMAS SURPRISE for a little girl and her dolly! These identical ANNE ADAMS outfits of blouse, skirt and reversible jumper-tops that button on are so adorable. Girl's set is Pattern 4711; Dolly's is Pattern 4751. We made the jumpers in green wool with their tops lined in red and green plaid gingham.

Dolly's pattern has ruffy slip, panties—plus a real square-dancing costume! Simple sewing — thrifty, too. When you choose fabrics for child's outfit, add just half a yard

of each fabric for dolly's matching jumper set. These patterns have step-by-step directions, but if you're a beginner and feel the need of some personal guidance on these or other ANNE ADAMS patterns, your local sewing center will help you.

Child's Outfit, Pattern 4711, comes in Sizes 2, 4, 6, 8, 10. Size 6 jumper takes 1½ yards 54-inch plain wool, ¾ yard 35-inch plaid gingham; blouse 1 yard 35-inch. Doll's Outfit, Pattern 4751, is cut for dolls 12, 14, 16, 18, 20 inches. To match child's

outfit, add ¼ yard to each of above yardages. For other requirements, see doll pattern. Watch for more Christmas ideas in your ANNE ADAMS column in your newspaper. Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

OUR COMPLETE SHORT STORY—

NEW LOOK

By HAROLD HELFER He Doesn't Recognize Her, And She Doesn't Recognize Him.

DOC GUSSON himself tells me this story while we are playing gin rummy in his back-alley office. Now, there isn't any reason for the Doc to be making it up just to sell me a bill of goods because I'm satisfied with my face as it is. Also, he knows I don't need any convincing that, even if he hasn't an official license, he's just as good a plastic surgeon as there is in town.

"I don't mean to brag, my boy," he says, "but, by gad, I do have a gift. Maybe I'm partial to molten rye and crisp greenbacks, but when I do a job it's a good one."

Then he starts the story of Eddie Dawson. This Eddie is a small-time crook, just a half step ahead of the police. Eddie has a set-up in an apartment house and one day a girl moves in across the court. He only runs across her casually but that doesn't keep her from affecting him strangely. The big moment in his life is when she comes to his table in a crowded restaurant. She has a low, husky voice. Now he knows something he has suspected. She is absolutely wonderful. She is for him. Eddie dreams of having dinner with her a lot more times, of taking her out to swanky spots, even of sitting on a park bench with her. Only,

it comes to Eddie bitterly, a man who is No. 4 or 5 on the cop's hit parade can't very well have a simple life like that. It's always behind shutters, in dark alleys. Eddie feels sure she is just as attracted to him, even if they are more or less strangers. Sometimes it just happens like that with two people in a book or a movie.

Then he thinks of Doc Gusson. A new face! a new life! and this wonderful girl!

Now ordinarily Doc doesn't ask questions. All he wants is \$2,500 cash. But the reason Eddie goes into all the details about this girl is because he's only got \$1,875. He is appealing to Doc's good nature. Usually, that don't work—Doc's no Community Chest. But this time Doc makes an exception. Partly, because he's a little hard up and partly because Eddie has an interesting face and it should be fun to tinker with.

Doc tells Eddie that there'll be pain and that he'll be uncomfortable for at least 10 days. Eddie says that's all right with him and Doc goes to work. The Doc has a room where he keeps his patients. Then one day the Doc removes the plaster and Eddie gasps at the mirror. "Is that me?" he cries.

Doc lights a cigar and grins. "When I do a job, it's a job," he says.

About four months later the Doc runs into Eddie in a north-side tavern. Now ordinarily the Doc's policy is to avoid former clientele but Eddie is so glad that the Doc's curiosity gets the best of him. Eddie says the surgery has all been in vain. No, the coppers don't hound him any more but he can't find his dream girl. She isn't living in her old apartment. He walks the streets night and day, hoping he will run across her. It is like the earth swallowed her.

"All of a sudden, while I am listening to him, I get the score," Doc, his eyes sparkling says to me. "In a town this size they are bound to run across each other—why, as little as I get out I've seen them several times — only she doesn't recognize him and he doesn't recognize her."

"Huh?" I say.

"That's right," the Doc beams. "About that time this girl comes to me and gets her face changed too. Seems the gendarmes are after her also."

"How do you know it's Eddie's girl?" I want to know.

"Because she doesn't have my \$2,500 standard fee either, so she tells me a rigamarole about wanting to start a new life and go straight because she's met a man across the apartment court," the Doc relates with delight. "It is because of this twist of fate, and the fact she has \$2,000 and I am a little hard up at the moment, that I agree. It was just the other day that I saw her, tramping the streets. She's looking for him. They probably cross each other's paths every day and never know it."

"But, Doc," I point out, "you could tip them off and arrange a meeting and—"

"Oh, no, my boy," exclaims the Doc, sticking a new cigar in his mouth. "I get a thrill when I run into these wandering, woebegone creatures. It's a continual tribute to the mastery of my art. Now, let's see, whose play is it?"

Heir-Apparent

—Central Press Canadian.

The new heir apparent to the throne of Sweden, Carl Gustaf, the late king's four-year-old grandson, is shown as he enjoyed himself at a circus in Stockholm recently. The child's father was killed in an air-liner crash in 1947.

WESTERN BRIEFS

Drop in Price

VICTORIA—Chocolate wholesalers report the price of chocolate bars will be reduced to six cents in Victoria. This includes one cent tax. Recently chocolate bars have been selling at eight, seven and six cents.

Win Cars

EDMONTON. — Leo Johnson of Winnipeg beat Frenchy d'Amour of Trail, B.C., 9-8 to win the Associated Canadian travellers' automobile bonspiel here. Johnson was one down going home when he scored two to win the four shiny new automobiles.

Plaster Figurines

REGINA.—This year's Saskatchewan Roughriders and Calgary Stampeders may be "saved" for posterity. Regina youth centre students hope to make plaster figurines of the players on both football teams before the end of the season.

Commercial Fishing

PRINCE ALBERT, Sask. — Commercial fishing on Lake Athabasca 500 miles north of here will open Dec. 1 after being closed for the last five seasons. It is expected 50 men will be employed and the take this year is set at 1,000,000 pounds.

Keeping Pace

VICTORIA, B.C.—The Gideons are keeping pace with modern transportation. The Victoria camp of the organization is attempting to arrange for Bibles and New Testaments to be placed aboard planes for use of air travellers.

Heads Honey Producers

EDMONTON.—Peter Kowalski of Edmonton was named president of the Alberta Honey Producers' Co-operative at the annual meeting. W. R. Sterling of Westlock was re-elected vice-president. Named to the board of directors were Harvey Smith, Beaverlodge; A. C. Bradley, Athabasca; H. T. Philpott, Brooks, and Alan Graham, Coaldale.

JOE GRIFFITHS TO RETIRE

SASKATOON.—E. W. (Joe) Griffiths, who has represented Canada as an official and as an assistant coach at two Olympics, will retire next spring after 30 years on the faculty of the University of Saskatchewan.

In 1937, the university named its new stadium, "Griffiths Stadium", in his honor.

Griffiths came to the U. of S. in 1920 as its first director of physical education. 2907

S.A.H.A. Adopts New Setup

SASKATOON. — A new deal, designed to attract entries from smaller centres and, at the same time group teams according to population was adopted for the 1950-51 association's intermediate playdowns at a meeting of club representatives held here.

Under the new setup, teams representing cities will compete in the A series. Club representing centres with a population up to 5,000 will play in the B series while clubs from villages and hamlets with a population of 1,000 or less will play in the C series.

These classifications will be subject to adjustment by the S.A.H.A. registration committee and the intermediate committee, which consists of Ken Mayhew, Yorkton, chairman;

Alberta Beet Growers Share Record Payment

LETHBRIDGE. — A record sugar beet payment for southern Alberta was mailed during the weekend. The payment, \$10 a ton for a total of 337,129 tons, covers beet deliveries to last Oct. 20. Some 1,500 growers shared the \$3,371,290 payment.

Another initial payment on this season's crop will be made after all deliveries are in.

Three factories are slicing 5,000 tons of beets daily. The total crop is expected to reach 440,000 tons.

John Staples, Kindersley, and Gordon Jukes, Melville.

The demand for a new intermediate playoff system came last spring after two city clubs, Saskatoon Legion and Regina Army met in the final with Legion carrying off provincial honors.

DO YOU HATE
GOING THROUGH
'CHANGE of LIFE'?

So many women between the ages of 38 and 52 have good reason to hate 'change of life'—the time when fertility ebbs away—when embarrassing symptoms of this nature may betray your age!

If this functional period makes you suffer from hot flushes or makes you feel so weak, nervous, restless, hard to live and work with—try Lydia E. Pinkham's

Vegetable Compound to relieve such symptoms. Women by the thousands have reported gratifying benefits. No other medicine of this type for women has such a long record of success.

Regular use of Lydia Pinkham's Compound helps build up resistance against such middle-age distress. The woman's friend!

Government Business Is Your Business

WITHOUT
Health
THERE IS NO REAL
Happiness!

To help maintain the health of its people is a government responsibility; to increase personal happiness through good health is the responsibility of the individual.

The Department of Health, through its district nurses, district health units, clinics, and other services, functions solely for the purpose of safeguarding health and improving health standards. You are asked to familiarize yourself with provincial health services and recommended health rules and practices so that you are capably informed when disease or illness threatens. When in doubt, consult your doctor, or if no medical service is available consult your district nurse.

Your Department of Health offers diagnostic, instructional, clinic or hospitalization service as follows:

ARTHRITIS: Free investigation and diagnosis, and treatment where indicated and ordered by the Director of Arthritis clinics, to all under 21 years of age suffering from rheumatoid arthritis. Clinics in Edmonton and Calgary.

CANCER: Free radium, X-ray, and surgical treatment plus free hospitalization when necessary for diagnosis where ordered by the Cancer Clinic in Calgary or Edmonton.

MATERNITY HOSPITALIZATION
Free public ward, hospital care for maternity cases.

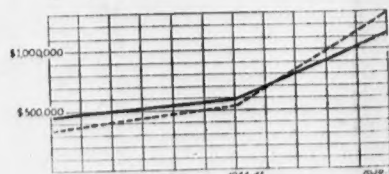

POLIOMYELITIS: Free medical, surgical, and hospital treatment for all suffering from paralysis due to poliomyelitis. Special academic instruction for children and vocational training for adults.

TUBERCULOSIS: Free treatment for all cases of tuberculosis and free diagnostic service through clinics and mobile X-ray units. Sanatorium beds maintained at Calgary and Edmonton with 300 additional beds to become available in the new Aberhart Memorial Sanatorium.

MENTAL HYGIENE: Mental patients are benefitting by the advanced methods used in provincial hospitals and training school. Provincial Guid-

ance Clinics are held regularly for cities, towns, and rural areas giving preventive service to promote good mental health.

NURSING SERVICE: District nurses in remote rural areas provide the following services free:
Pre-natal, natal and post-natal care.
Free immunization services.
Regular baby clinics.
School health inspections and emergency service.

Dotted line shows increased amounts spent for Cancer and Tuberculosis treatments in past ten years.

Heavy lines show increased grants to Alberta hospitals in last ten years.
